ETL-200-375 and ETL-200-375M transducers employ the same approach to transducer construction as the standard ETL-375 and ETL-375M series. The ETL Series uses Kulite's Patented Leadless Technology. The Kulite proprietary electronics module in this product

line, however, provides a current output signal (4 to 20 mA). These instruments are an excellent choice for applications requiring the current output signal but in which space and/or weight are at a premium.
