

# ROCK SOLID™ SCALES

**FC3-C** SERIES

# FG-K SERIES

## Fast Response for Efficient Weighing Applications

The New FG-K series combines fast response time with accurate measurement to suit any weighing application.

- RI-2-3** • **Three weighing resolutions** Normal (1/3000), \*High (1/6000 for 30kg and 60kg weighing capacity) and \*Higher resolution (1/12000 for 60kg and 1/15000 for 30kg and 150kg weighing capacity) \*non NTEP settings
- 
**Counting function** Useful in piece counting applications with sample size of 5, 10, 20, 50 and 100 pcs for unit weight registration
- 
**Comparator function** HI / OK / LO comparator indication and optional relay output ( FG-24) for checkweighing applications
- 
**Calibration function** Simple calibration with external mass

- 
**Auto-power OFF function** Saves power consumption by automatically switching itself off when the scale displays zero for approx. five minutes
- Low power supply indication** Alerts user to check AC power supply “Lb1” or batteries “Lb0”
- Filtering function** Filtering levels of slow, normal and fast are selectable to suit environmental conditions
- Leveling feet and bubble** Easy to adjust the level of the scale for accurate weighing
- 
**Optional RS-232C and Comparator Output** Easy to connect peripherals such as printer, comparator light and computer for weighing system applications
